

ESCAPE FROM THE ROBO-SCHOOL OF DOOM!

CLUES

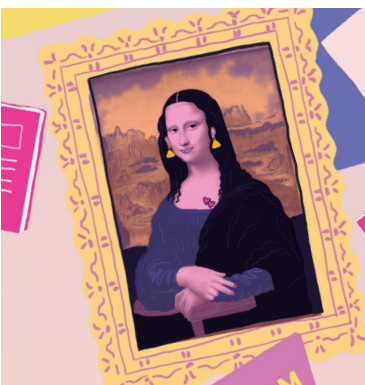

Hopefully these clues will help you Escape the Robo-School of Doom, QUICK-SMART!

PUZZLE NUMBER 1

Find all the words in the word search from the list of things on the menu. You should be left with five letters. What number does this spell out?

PUZZLE NUMBER 4

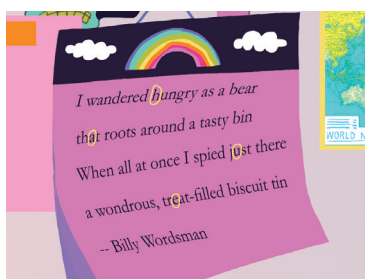

Take a look at the unusual additions to the Mona Lisa.

PUZZLE NUMBER 2

The numbers in Fernando's tank are: 1,2,5,41 and 122. There is a sum that will help you discover the missing number. It is on the front of one of the text books. Can you find it on the page?

PUZZLE NUMBER 5

Write out the alphabet and give each one its code number starting with 1 = M, 2 = N up to 26 = L. What numbers are the letters H, A, U and E? Add these together. Next count up the number of letters in BILLY WORDSMAN. And divide your first total by this number.

PUZZLE NUMBER 3

There are six ripped out pages that you need to find. Did you spot the one at the top of the left-hand page?

PUZZLE NUMBER 6

There are 18 Cog Nobs in total and 27 MicroChip Cookies.

Remember your 9 times table. This will help you simplify the two totals and then show them as a fraction. Remember to put the number of the first biscuit mentioned above the line and the number of the second biscuit mentioned below the line.

The denominator is the bottom number in a fraction.
